

# Calling out to accountants...

The Information Commissioner's Office (ICO) is calling on accountants to play a role in data protection compliance.

[Click here to read the article from the ICO.](#)

This means that accountants should be confident about asking their SME clients the following questions:

1 How much does your client know about data protection compliance and the ICO?

2 What types of personal information will they collect on a day-to-day basis?

3 Encourage them to ask 'why' they are holding this personal information?

4 What security measures do they have in place?

5 Do they know what a Data Subject Access Request (DSAR) is?

6 Do they know what to do if their business has a personal data breach?

7 Do they have a privacy notice?

As an accountant, are you ready to engage in discussion with clients on these topics?
